President's Message

March 10, 2024 - I was up north over the weekend and as we near the end of the shortest warmest winter I've experienced, there was open water off the dock where loons and geese were both back competing for nesting grounds. The ice was quite thin and didn't completely freeze over out in the wide parts of Lake Joseph. The lake trout population will have received very little ice fishing pressure, but expect that local retailers will have had a tough season with reduced demand for winter activities. We got out for 2 weekends and the ice was less than a third of it's usual thickness.

2023 was a good year on the lake with another lovely Lake social hosted by the Ader's on July 8th and the AGM was held in Rosseau on August 13th with much appreciated speakers: Mayor Ann MacDiarmid and the MLS's Ken Pearce providing attendees with an overview of issues and developments in Seguin and across the Muskoka Lakes. Please consider supporting the MLA in addition to LLJA as they advocate for the broader Muskoka Lakes Community on matters of mutual interest

Golf Balls

Some issues coming to your board's attention are excessive lighting and several complaints about people hitting balls into the lake ... aside from the chance of hitting a swimmer or boat please consider the following from NH Lakes:

For some golfers, hitting golf balls into waterbodies is a favorite pastime. Trying to see how far you can track your ball after hitting it towards an ocean or lake makes for a relaxing afternoon for some golfers. The balls sink - out of sight, out of mind. But, it is estimated that golf balls can take up to 1,000 years to decompose, and they are dangerous to aquatic life.

Golf balls fall under the definition of "refuse" and purposefully driving them into public waterbodies is considered littering ... Discharge toxic metals and rubber. Contain microplastics. Pose a threat to boaters.

Golf balls hit into the water have substances added to them that are harmful to wildlife. For example, zinc oxide and benzoyl peroxide, sometimes added for durability and flexibility, are both highly toxic to aquatic organisms. Biodegradable golf balls exist!

However, stay away from ones with fish food cores which can contribute nutrients that lead to cyanobacteria blooms

Sunrise over Little Lake Joseph

Mayor's Message

Ann MacDiarmid, Mayor

As little of winter as we had, it is a special time of year to welcome our seasonal residents back, see boats on the lake and the new life in the forest. The winter weather has not been kind to our roads and our crews who have been fighting with the freeze/thaw cycles for the past few months.

While we understand that many of the roads are very slippery and muddy, we urge everyone to be patient, drive slowly and respect the half load limits that have been implemented for more weeks than ever before. We hear your frustrations and have every available crew working hard to improve the situation.

Council has recently approved new, updated bylaws for site alteration (blasting, fill and earth moving), tree cutting and fireworks. A communication plan to advise everyone of the changes is in the works.

If you plan any work on your property and you are in doubt, please reach out to the Township for advice on what is permitted. The overall goal of the new strengthened bylaws is to ensure that we are all doing our utmost to preserve our precious environment.

Council has approved operating and capital budgets for 2024 in principle with a combined tax rate increase for the average ratepayer of 4.59%. This includes a first time 1.5% capital levy to establish a Capital Asset Management Reserve Fund to ensure that we are building a healthy sustainable financial future for Seguin. The details of these tax rates will be confirmed as all of the external levies are received by the Township.

I am proud to share Seguin's 2023 and Beyond Strategic Plan which you can find at www.letsconnectseguin.ca . While prioritizing the environment, we plan to Lead, Grow and Connect to build a future for many generations to come.

The environmental and site planning work continues on the north Seguin lands that were rezoned last year for attainable housing. It won't be long until we will be announcing the first of the public consultation on these lands. We are working closely with our partners at the Wasauksing First Nation to ensure that all development respects the traditional values of these lands.

And, the West Parry Sound Recreation and Culture Centre – better known as "the pool" - will start construction this spring at 44 Joseph Street – next to the new Parry Sound High School. We expect you will be swimming in the new pool in 2026. We urge the LLJA to get involved and help build this long awaited community facility. You can learn more at www.letsmakeasplash.ca

I appreciate the opportunity to share Council's news with everyone on Little Lake Joseph. We do depend on you and your families to keep us posted on your news and your concerns. I wish everyone a safe and happy cottage season.

Ann MacDiarmid 705-346-2210

Artist's Concept: West Parry Sound Recreation and Culture Centre (better known as "the pool")

Dennis Jean-Marie Obituary

Denis was born in the Muskoka/Parry Sound region to parents Arthur and Emily (nee Raymond). The eldest of eight boys, Denis had a great love for this region. While he did leave for several years to finish schooling in Toronto, his heart was in the northern shield country. He brought his Toronto bride to live with him on Lake Joseph close to his parents' home.

Denis was a talented wood worker and had occasion to restore some of the region's classic wooden boats. However, he became a jack-of-all-trades, turning his talented hands to many enterprises including home building, plumbing, electrical and mechanical work, and was employed for many years with Graham Hazel in Foote's Bay and later at Lake Joseph Marina on the Joseph River outside of Minett.

Denis was always busy and when not working at his regular employment he would be looking after local cottages. In addition, volunteerism was important to Denis; he believed in giving back to his community.

He served for many years on the Humphrey Township Committee of Adjustments, the Bracebridge Power Squadron (Commander Ret.), the Peninsula Lion's Club (awarded a lifetime membership), the Little Lake Joe Association and his church's Board of Directors.

Through these organizations he became involved in many diverse groups including the CNIB Centre on Lake Joseph, The Camp for the Deaf, regional public speaking contests for local school children, and water quality testing on Little Lake Joseph.

Denis was a storyteller. His tales were of his own family who moved to the region in the mid 1800's from Quebec as well as other early settlers. His stories were always preceded by that twinkle in his eyes which was his trademark. His eyes would get that twinkle and he would launch into his story.

He had a love of all things to do with boats, and a secondary interest in flying. While living in Toronto, he was in the Air Cadets and would bicycle from Parkdale to Malton Airport with his best friend John. He wanted to be a commercial pilot but was unable to pursue that vocation due to colour blindness. Much later in life he expressed an interest in marine biology and wished he had gone down that route. He owned every issue of National Geographic from 1946 through to 2008 and eventually read them all cover to cover; he was curious about the world, but perversely did not really want to leave home.

He did eventually make it to the UK a few times, to South Africa and some exploring in Ontario all with family. Denis passed away at Belvedere Heights Home for the Aged in Parry Sound with his family at his side.

He is survived by his loving wife of 68 years, Elizabeth (Betty), three children Linda, Karen (Brown) and Paul. He was called Poppa by grandchildren Amy, Courtney and Melissa. Proud great grandfather of Willow, Kai, Zoe and Keira. Remembered by three of his brothers Brian, Vernon and Philip and their familes. Denis is deeply missed by family and friends but we know his spirit is free to soar. A celebration of his life will be held at his home at a date in June 2024.

Our Water Quality

Wesley Begg and I sampled our lake water quality three times last summer. Each time we measured clarity by lowering a black and white disc (called a secchi disc) to see how low we could still see the disc.

We took this measurement in the middle of the lake and found the lake to be much more clear than in prior years. We could see the disc down to 6.4 meters. For the first time the rope which held the disc was not long enough so we had to guess how much more we could see.

We also measured total coliform and E-Coli at two shore locations, one in front of the Teichman cottage and one in front of the Johnstone Cottage. These are measurements of bacterial content in the water. All lakes have some of these bacterials but it could be a problem if a lake has too much.

The average total coliform reading was 5.5 cfu/100ml and the average E-Coli reading was 1 cfu/100ml. These readings are both well below the maximum limits deemed OK by the MLA. Most important was the E-Coli reading which was substantially better than the maximum permitted. Wesley and I attribute the great water clarity and the low total coliform and E-Coli concentrations to the weather we had last year. You will remember we had a warm, very sunny summer with very little rain last year.

The lack of rain resulted in very little runoff from shorelines and, most important, from the swamps which empty into our lake, and this no doubt contributed to these great results. Wesley, Doug Young and I plan to test our lake waters again this summer and will have some preliminary results to share with our members at our Annual Meeting

MLA Raises Safety, Noise & Environmental Concerns About Proposed JW Marriott Outdoor Concert Venue

We have learned that the JW Marriott on Lake Rosseau is considering creating an outdoor concert venue in a field beside their hotel for over I 0,000 people. The proposal is to host a multi-day outdoor concert on the upcoming July long weekend.

Plans have not been made public by the JW Marriott and the MLA is seeking details from the Township to make a complete assessment of what appears to be inappropriate for this location. Material has also been released by Live Incorporated (an affiliated company that will manage these events) describing a proposed new building at the site with accommodation for visiting bands. This may only be the beginning. It may become a regular weekend event over the summer.

It appears that about 20 trees have been cut in the field beside the hotel where the concerts are proposed to be held. The field also has two ponds and abundant vegetation and wildlife.

Live Incorporated describes the proposed concert venue on their website and is defending the plan on social media by painting it as being good for the economy: "The JW Marriott has had several meetings with all local officials and has been very transparent in promoting economic activity. We should all be thankful for the employment, taxes, economic stimulus and great stewarding of the JW Marriott. We cannot comment on other motives at hand. All we can say is thank you to the JW Marriott for having such great vision and foresight in making Muskoka a better place for all to enjoy."

MLA Concerns

The MLA has received much communication from members raising significant concerns if this proposed outdoor concert venue goes ahead, which we are seeking to have addressed. These include:

1. Public safety and security (including OPP, Fire Department and EMS);
2. Traffic (especially across the one lane bridge at Port Sandfield);
3. Parking;
4. Sanitation and other environmental concerns (especially due to the site's close proximity to Wallace Bay on Lake Rosseau; garbage; and two ponds in the proposed site);
5. Noise;
6. Housing/ accommodation;
7. What licences and permits are required and whether they have all been obtained (for example, a liquor licence); and
8. Whether the proposal is in compliance with all applicable laws ·and agreements (including municipal by-laws and site plan agreements).

Next Steps

We have communicated our concerns to Township of Muskoka Lakes Mayor Peter Kelley and staff. They are also concerned about potential Township wide disruptions and public safety and are working with the JW Marriott to ensure these are addressed or other options are considered.

Mayor Peter Kelley states: "I met with Marriott's management team this week seeking to better understand their plan to ensure the safety and security of all residents of, and visitors to, our Township. Because of the nature of the planned event, its location and its timing, I am also particularly concerned about potential disruption to our residents, our natural environment and the use of local roads and other infrastructure. I, along with Township staff and the leaders of other local public safety organizations, will continue to meet with Marriott's team until we are satisfied that such plans are in place. Ultimately, if this does not seem viable we will have to look at alternative options."

The MLA will continue to monitor these concerning developments closely and as more information becomes public, we will continue to respond fully.

LLJA 2023 Annual General Meeting

LLJA Annual Meeting

Sunday, August 18, 2024 9:30 AM
Rosseau Memorial Hall
2 Victoria St W., Rosseau

LLJA Social Event

Saturday, July 27th 5-7 PM
Location: MacDiarmid cottage, 35 Moose Trail

Families and Friends are Welcome.
Refreshments for all.
Hors d'ourves will be served.
There will be Prizes for the kids.

WEST PARRY SOUND HEALTH CENTRE FOUNDATION

West Parry Sound Health Centre Rolls Out Online Emergency Department Wait Time Tracker Generous Support from The Friends of Muskoka Lakes Makes Initiative Possible

PARRY SOUND, March 18th, 2024 – West Parry Sound Health Centre (WPSHC) has rolled out a new tool to better inform our community about wait times in their Emergency Department (ED). Patients with non-critical care needs, that are still in need of timely care do not always have alternatives to visiting the Emerge in our communities.

The Emergency Department must always prioritize critical patients, which can result in rapidly changing and longer wait times for those with less critical needs. Recognizing that the process can be frustrating, WPSHC hopes that this initiative will help advise decision-making and empower people in matters related to their health.

The new tracker was made possible by efforts put forward by the West Parry Sound Health Centre Foundation and a very generous donation from the Friends of Muskoka Lakes, a philanthropic collective with a special interest in the health of the region. Designed to inform people of the current wait, in real time, the tracker also provides predictive data, that shows average wait times over the course of the day.

The predictive data illustrated by the white line, in the graph will become more and more accurate as the tracker is able to collect more data. These trends will allow individuals with non-urgent needs to better plan their visit and will hopefully result in better workflow for the dedicated staff overseeing the ED.

In addition to wait time information, WPSHC has also included information about potential alternatives to access qualified health advice. While many concerns will still need to be seen to in person, the expanse of virtual care options in our region can help individuals make more informed decisions about how to proceed. Services, such as Health811 where any individual in Ontario can dial 811 to speak with a qualified health care provider at any hour of the day, for free, are not well known about yet, but can be useful tools. This information along with details about minor ailment consultation available through some local pharmacies, and access to the North East Virtual Care Clinic operated by nurse practitioners has all been collected and included on the tracker for ease of use.

"We know that accessing the right care, at the right time is not always a straightforward endeavour," said Donald Sanderson, Chief Executive Officer of West Parry Sound Health Centre.

"We also know that knowledge is power and hope that by sharing what our team is experiencing with the public, we will be empowering individuals in our community to make more informed decisions. Anyone experiencing a medical emergency must of course still dial 911 or proceed to the nearest emergency department. However, those who seek care through our ED team for less urgent matters, now have more information at their fingertips."

"Our ED team is always working as hard as they can, often in difficult circumstances, to ensure that everyone who enters seeking care is seen to as quickly as possible," said Tanya McCarthy, Clinical Manager of the Emergency Department, and Intensive Care Unit.

"However, we understand that waiting is difficult, and that not knowing what's going on behind closed doors can be frustrating. While we won't be able to change how long you may have to wait, we hope that giving patients more information will help better inform their decisions or maybe make the wait a little more bearable. Our team is excited about the new tool and very grateful to the Foundation and generous donors for making it happen."

The ED wait time tracker is located on the lefthand menu of the WPSHC's home page or can be accessed by visiting https://wpshc.com/disclaimer/

Minutes of
Little Lake Joseph Association Annual Meeting
Sunday, August 13, 2023, Rosseau Memorial Hall

Board Attendees:

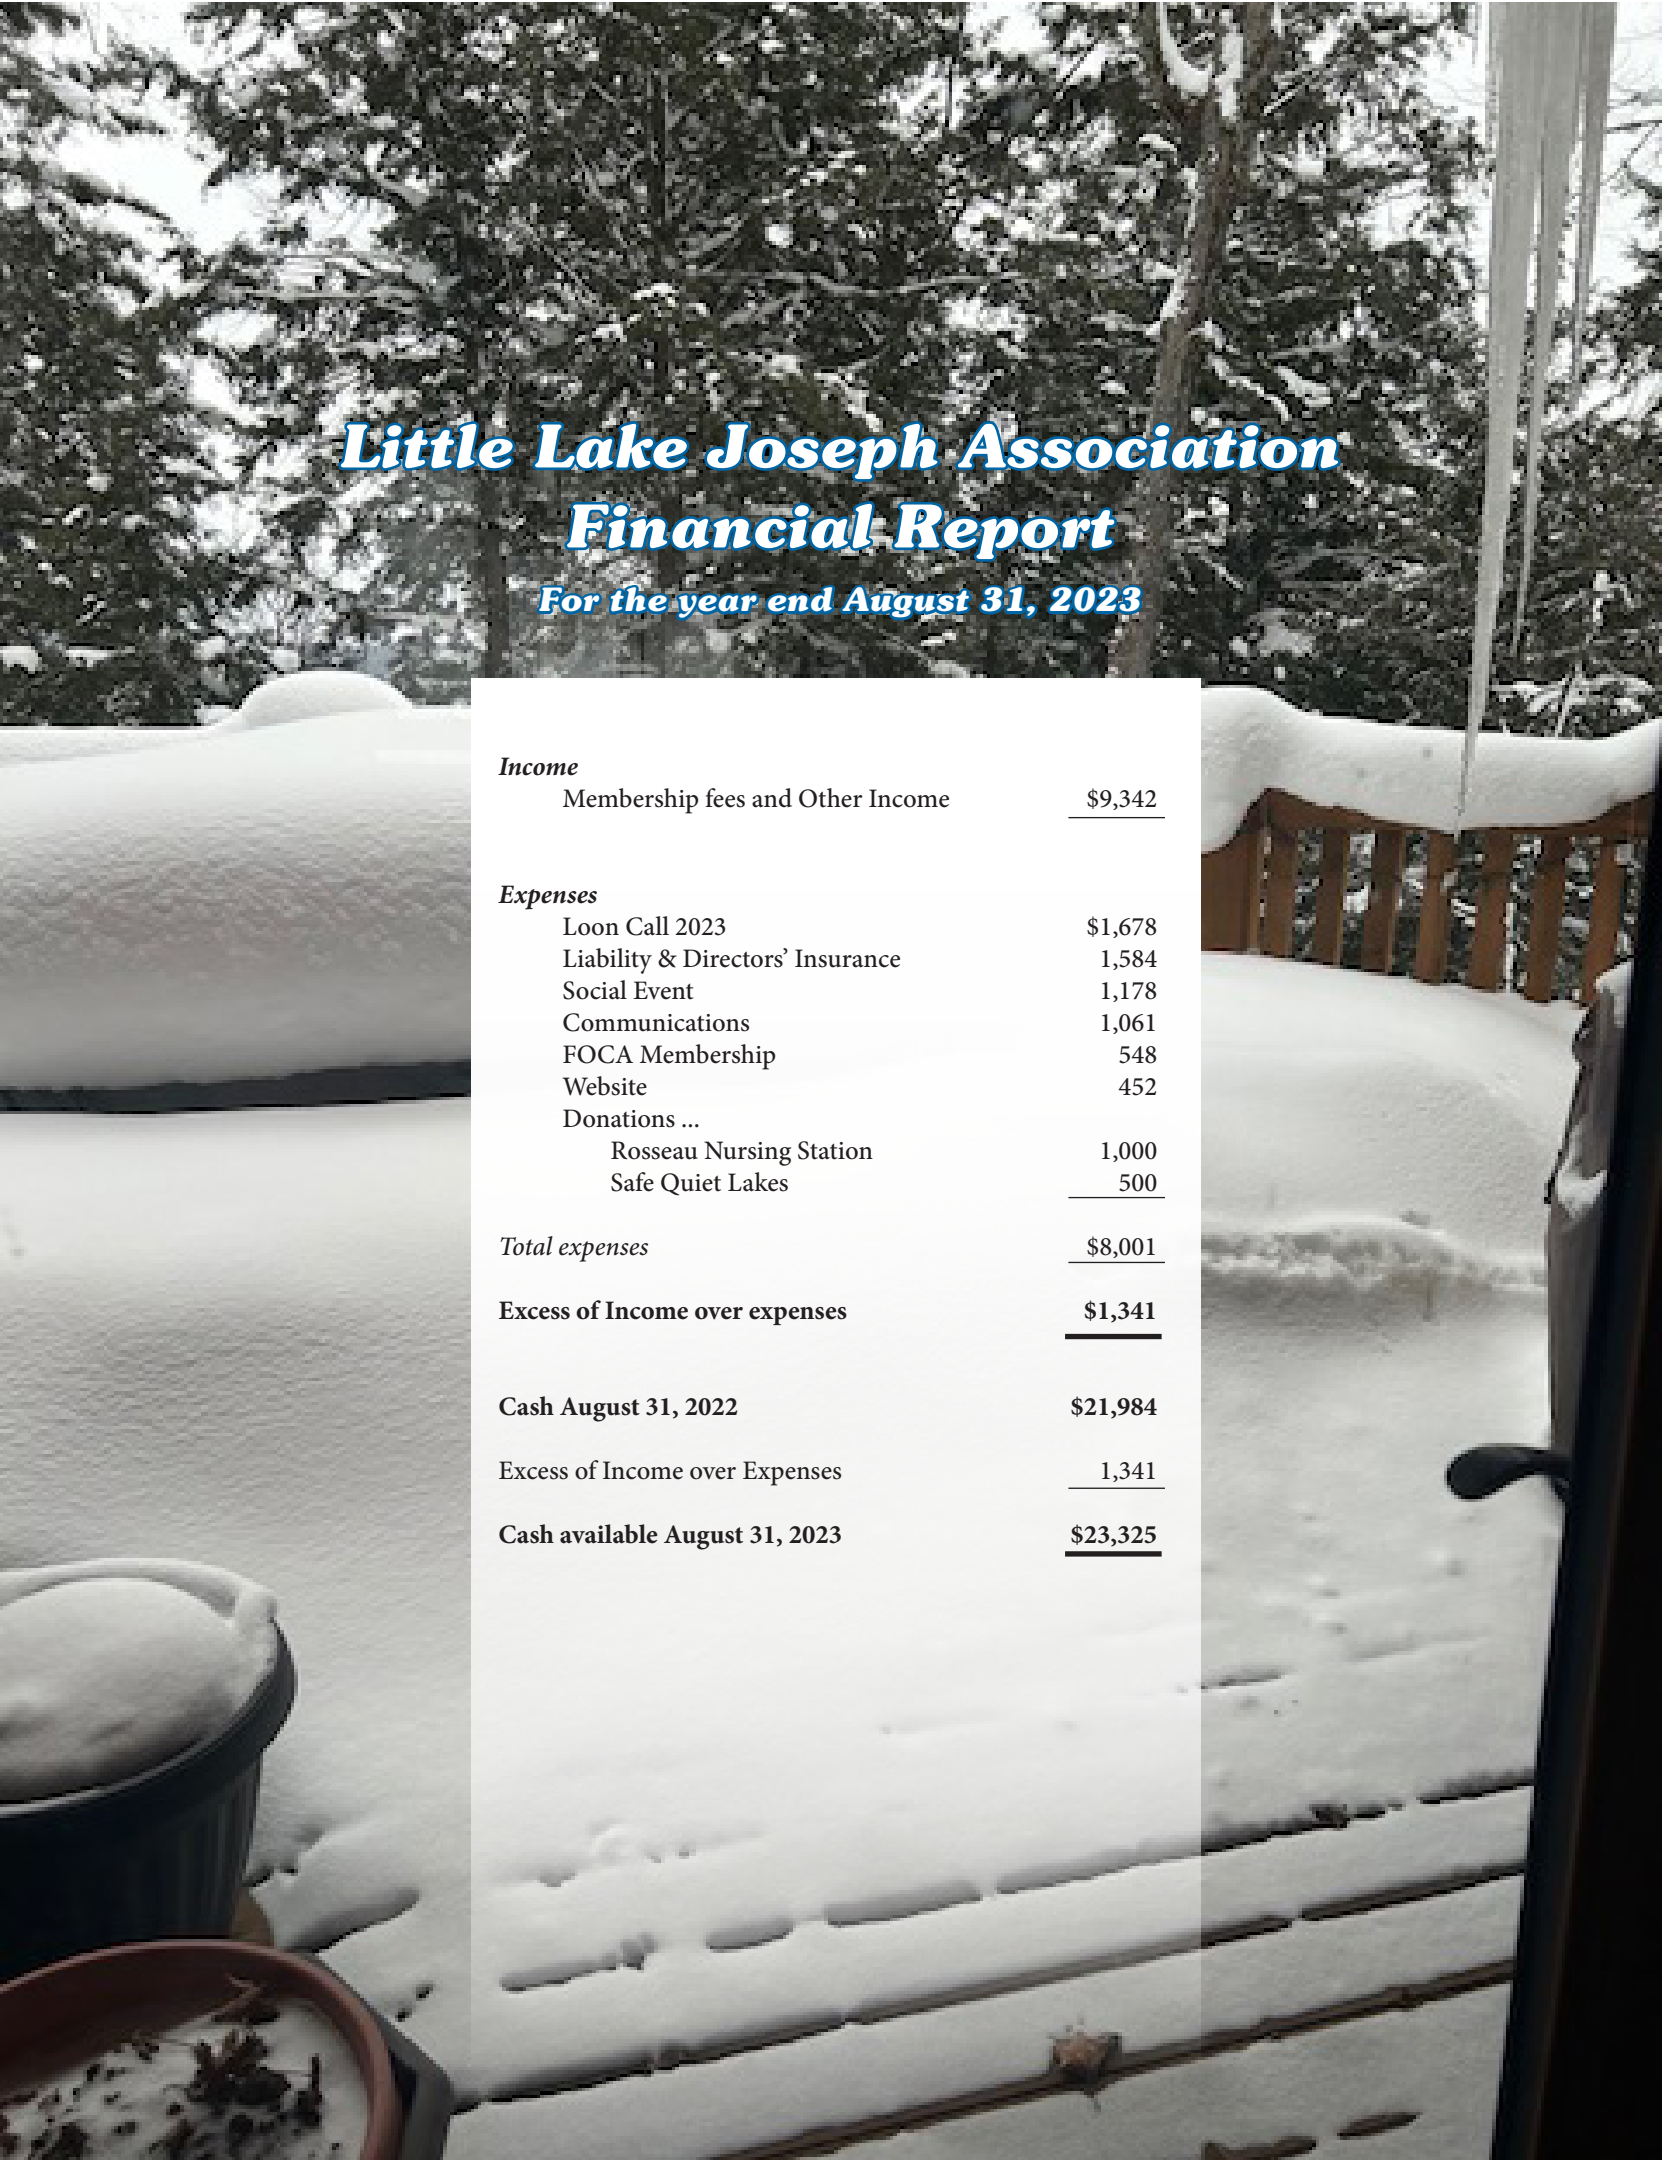
Dirk Soutendijk	–	**Water Testing**
Paula Kirsh	–	**Treasurer/Membership**
Ian Davidson	-	**Secretary**
Wesley Begg	–	**Water Testing**
Suzanne Koenderman	–	**Loon Call**
Elizabeth Edmison	–	**Community**
Ron Edmondson	–	**Social**
Mark Johnstone	–	**President**
Alf Kwinter	–	**Membership (Sends regrets)**

1. **Welcome and introduction. Confirmation of Quorum.**
   - Total attendees: ~26. Confirmation of Quorum. A quorum of Directors and members was confirmed. The meeting commenced at 9:35.
2. **Board Update – Agenda Overview – Current Issues - Mark Johnstone**
   - Relatively quiet on the lake and the issues that are being raised by members. Issues that have been raised recently include: asking cottages to not hit golf balls (plastic) into lake; asking cottages to address lighting pollution impacting dark skies; boating safety and etiquette – e.g. boating close to shore/islands/docks. Please respect your neighbours and if you have issues or concerns you can contact LLJA to assist, or the Town where appropriate.
3. **Water Quality Testing 2022-2023 – Wesley Begg/Dirk Soutendijk**
   - Phosphorous remains high which is consistent with prior years. Bacteria testing has not been done for several years when MLA stopped bacteria testing in low-risk areas such as LLJ. Based on LLJA and other lakes requesting, MLA plans to restart some bacteria testing. LLJA may also do other testing if warranted. Testing to date on LLJ indicates some bacteria but no e coli. Recommendation remains to treat your water e.g. filter/UV filter. Cottages can do your own water testing at your cottage through test kits available at Public Health Ontario.
4. **Loon Call – Suzanne Koenderman**
   - Another great Loon Call. Suzanne put out a call for ideas on the Loon Call. As a reminder, we are always looking for membership to provide ideas for content, photos so please reach out! Suggestions discussed in the meeting: provide captions on photos, information on new families on the lake.
5. **2023 Summer Social Report – Suzanne Koenderman/ Ron Edmondson**
   - Thanks to Ader's who hosted again this year. We had only 38 people at the social this year (weather related?). The cost was around $1,100 dollars. Discussed if a different format may work better and general feeling that it should retain more of 'social' with families + kids, than cocktail party, and not a 'regatta' on the water unless insurance liability is clear. Review if July vs August re timing.
6. **Membership update /Financial Statements as shown in Loon Call**
   - Paula shared that we have a record of 117 cottages and 92 paid, a good result. Paula motioned to move the financials to be approved; seconded by Stephen Forchon. Vote carried by show of hands.
   - Financials have been relatively consistent to prior years, including a nominal contribution to the Nursing Station and Safe Quiet Lakes. No engagement with the Rosseau Historical Society in the past year. LLJA continues to assess if there are any other community-based causes for a LLJA donation.
   - Paula Kirsh retirement. After over 20 years on LLJA as Treasurer, Paula is stepping down. Paula shared that she has been on LLJ for nearly 50 years, and first started with LLJA in support of her late husband Gerry and quickly taking on a direct role to steer the LLJA all these years as Treasurer. We are grateful to all that Paula has done. Elizabeth Edmison has agreed to take on this role.
7. **Director Openings – Motion/Vote Required. Call for nominations**
   - Mark opened nominations for new membership and moved to reappoint Suzanne and Alf to the board for new terms. Seconded by Stephen Forchon. Vote passed by show of hands.
8. **Presentations:**

   Muskoka Lakes Association (MLA) Ken Pearce
   - We were pleased to have Ken Pearce from MLA speak to the great work MLA does for issues that matter to LLJA. Please consider joining the MLA if you are not as MLA does advocacy and stewardship for the wider Muskoka region, beyond what LLJA or Seguin does.
   - MLA is continuing to push for greater environmental standards to address development, excessive blasting, and tree clearing.
   - Development at Minett is a focal point of MLA to find the right balance and preservation across several different files that include: the municipal zoning and master plan (this is township of Muskoka Lakes), the Legacy Cottages (subdivision) that is seeking expansion; expansion of Red Leaves condos by the lakefront; Clevlands House redevelopment and current caps on units. Water quality and shoreline is a concern - e.g. the current wastewater treatment plant has spilled into the lake on occasion
   - Dark skies mandates for MLA to have lighting that is only downward facing and with light shielding.

   Mayor Ann MacDiarmid
   - Progressing on affordable housing (2800 homes over 15 years) starting with municipal zoning order to change part of Seguin near Parry Sound development of homes
   - As a first, Council was sworn in with a smudging ceremony with Wasauksing First Nation (on the west side of Seguin, near Parry Sound). As part of developing that relationship, Seguin signed a MOU for water and sewer co-sharing on a win-win basis.
   - Plans and fundraising for the new recreation and aquatic centre are progressing. Active drive for community fundraising support with details of Kim's Swim shared.
   - Jean Marie Road / Stanley House intersection road repairs planned but with the original (log) corduroy road that is ~100 years old, this will take some time
   - Development and zoning. There are two by law enforcement officers who focus on all byelaws (they also serve as dog catchers)
   - Short-term rentals. Council did not pass a new licensing program that would have focused on things like number of guests, septic, term of rental, fire alarms, minimum terms. The number of incidents reported on this topic has reduced. Licensing may come back on council in future. Muskoka Lakes is also reviewing licensing plans
   - Fibre rollout is still in process with Bell, who have a target of 2025 to cover Peninsula Road, Stanley House, Jean Marie. The Town is tracking and flagging that they also speak to road associations for extension to private roads and cottages. Timing/costs TBD.
   - Discussion on backlot development at 109 Jean Marie Road. (note: after meeting Ann provided LLJA with an update that the owner who has a trailer is in the process of confirming build plans with the town so the trailer is permitted)
10. **Adjournment**

Meeting adjourned 11.00



Little Lake Joseph Association
Financial Report
For the year end August 31, 2023

Get Involved In Your Association

The heart and soul of any organization is its members and new voices and points of view are vital to longevity. Any member of the Little Lake Joseph Association is welcome to put forth their name to join the Board of Directors.

Presently, the Board meets twice a year - usually on the May long weekend and again in the fall. Volunteers are also welcome to assist with activities or committees. I hope you will consider volunteering your time and expertise to the LLJA.

Appeal to Non-Member Residents of LLJ

The LLJA is comprised of volunteers who freely give of their time and expertise for the benefit of all. We urge those residents who have not joined to do so per the form on page 14. It is a great value.

Little Lake Joseph Association

Box 1268, Station "K", Toronto, ON, Canada M4P 3E5

ANNUAL MEMBERSHIP DUES 2024

COMPLETE AND MAIL TODAY

The Little Lake Joseph Association (LLJA) is pleased to have almost all of our shoreline residents as members. Please encourage your friends and neighbours to become members so that we can continue to provide the best representation for all of us on important issues like water quality, boating safety and political representation.

Please complete this membership form and send us your 2024 membership dues now. You can send us a cheque to the letterhead address above or you can now pay your dues using Interac e-transfer.

If you would like to take advantage of paying on line, please follow these instructions:

1. **Log onto your own online banking account.**
2. **Set up LLJA as a new "payee" using the following LLJA email address:** [redacted]
3. **Use the following security question and answer:**
   - **What is the name of our LLJA annual publication?**
   - **Answer: "looncall" - it is case sensitive so use all lower case letters and type it as one word**
4. **Please indicate your full name and which cottage membership this payment is for. You can do this in the "notes" field of the Interac form.**

Alternatively, you can mail us a cheque for $100.00 payable to the "Little Lake Joseph Association", with this completed form to the above address as soon as possible.

Please check out our refreshed website at www.llja.ca regularly for news, useful information and special events including a section where you can submit ideas or questions to your board. If you wish further information related to LLJA membership please contact Elizabeth Edmison by email: [redacted]
